

City of Bristol, Virginia Capital Improvement Program

Introduction

One of the most important duties of a local government is capital improvement planning. A capital improvement program consists of two (2) components, the capital plan and the capital budget. The capital budget is an element of the locality's annual budget adoption process and details the upcoming year's planned expenditures for capital projects. This capital budget is based on the capital improvement plan. The plan is a listing of capital items that the locality anticipates undertaking within the next five (5) years. A capital item is any tangible asset or project with a total cost of \$5,000 or more and a useful life of longer than 1 year.

The Capital Improvement Program (CIP) for the City of Bristol, Virginia is intended to provide four (4) basic benefits:

- The CIP is a formal mechanism for decision making.

 The CIP provides the City with an orderly process for planning and budgeting capital needs. It provides answers to such questions as what to build, when to build, and how much to spend.
- The CIP links the budgeting process to the City's long range planning process.
- The CIP is a financial management tool.
 A capital improvement plan can easily be seen as a "wish list" for government spending.
 However, the capital budget component of the program requires prioritization of capital items based on estimates of revenue, possible financing mechanisms, available funding and existing debt. This ensures that the best use is made of financially constrained capital dollars.
- The CIP is a reporting tool.
 The program provides a source of information for citizens and businesses alike to be informed about planned city expenditures and needs.

Organization

The Capital Improvement Program is composed of both process and format. A CIP committee will be formed. It will consist of the City Manager, Chief Financial Officer, Director of Public Works and other applicable City Staff. Each capital item to be included in the plan is sponsored by a department head and must be submitted to the CIP Committee with a valid Capital Improvement Item Worksheet. The worksheet provides details of the capital item to be purchased or the project to be undertaken. The Committee will convene to review the current year's capital budget, consider new capital item submissions, and discuss available funding. The Committee will update the capital improvement program as needed, which may include reprioritizing the capital items included in the plan, redistributing funding and adjusting delivery dates.

Following the work of the CIP Committee, the CIP will be submitted to the City Manager. The City Manager will review the plan and present it to the City Council.

City of Bristol, Virginia Capital Improvement Program

Capital Improvement Program Process

The Captial Improvement Item Worksheets are submitted to the Capital Improvement Committee

The Capital Improvement
Committee monitors capital
improvement expenditures and
how they are adherring to the
City's long range plans and vision.

The Capital Improvement
Committee prioritizes capital
improvement items and prepares a
capital plan listing anticipated
capital items for the next 5 years.

The City Manager presents the Capital Improvement Plan to the City Council.

A Capital Improvement Plan is prepared and presented to the City Manager.
